

ISIKA ADAMU

MEBANE, NC | isiakaadamu161@gmail.com | 336-521-3220

Committed and outcome-oriented Frontend Developer with a strong track record of building responsive, user-friendly web interfaces and optimizing performance in dynamic environments. Accomplishments include improving user experience through clean, maintainable code, efficiently resolving complex UI and frontend issues, and collaborating closely with cross-functional teams to deliver high-quality products on time. My objective is to leverage my technical skills and attention to detail to contribute to impactful digital solutions and drive the success of my organization.

CORE SKILLS

Frontend & Development: React.js, Next.js, JavaScript, TypeScript, Tailwind CSS, Responsive Design, UI Component Development, RESTful APIs, SEO Optimization, Schema Markup.

IT Support & Systems: Desktop Support, Help Desk, Software & Hardware Troubleshooting, Active Directory, Network Support, Windows & Linux OS.

Databases & Tools: Microsoft SQL Server, MySQL, Firebase, Git, GitHub Actions.

Methodologies: Software Development Life Cycle (SDLC), Clean Architecture, Test-Driven Development (TDD), Debugging & Testing.

Professional Strengths: Problem-Solving, Communication, Time Management, Teamwork, Adaptability, Documentation, Cross-Functional Collaboration, Positive Attitude and Feedback Reception.

Frontend Developer / IT Support

Conduent

Jan 2022 – Current

Technologies: ReactJs, Typescript, Tailwind CSS, NextJs, SQL

- Developed and maintained responsive frontend solutions using ReactJS, NextJs and Microsoft sharepoint to improve usability across desktop, tablet and mobile devices, resulting in a smoother and more consistent user experience.
- Led the Frontend team and collaborated with Backend developers and Product managers to gather requirements and ensure efficient integration of features to align with the business requirements and solutions.
- Designed reusable and scalable UI components to reduce code duplication and improve long-term maintainability of applications.
- Integrated RESTful APIs to enable real time data exchange between frontend interfaces and backend services, ensuring accurate and up-to-date system functionality.
- Participated in the full application lifecycle, from requirements gathering and design to deployment and post launch support, ensuring stable releases and quick resolution of production issues.
- Efficiently managed and queried the products databases using Microsoft SQL Server Management Studio and MySql to support application features and troubleshoot data-related issues.
- Documented and escalated intricate technical issues to the appropriate departments for swift and efficient resolution, maintaining a focus on timely problem-solving.
- Improved product SEO and search quality using features like Schema markup to enable the display of rich results and more engaging features when the website or product is searched on Google.
- Conducted comprehensive product demonstrations and training sessions to improve user

- adoption, aiding in their comprehension and utilization of the products.
- Provided IT and application support by troubleshooting software, access, and system-related issues, ensuring minimal disruption to business operations.

Frontend Developer / IT support.

Adecco Staffing

June 2020 – December 2021

Technologies: ReactJs, Typescript, Tailwind CSS, NextJs, SQL

- Designed, developed, and maintained scalable frontend applications for eCommerce, real estate, micro-finance, and insurance platforms, ensuring reliability and performance under varying workloads.
- Spearheaded product initiatives, consistently exceeding performance metrics and ensuring client satisfaction.
- Analyzed user and client requirements to implement intuitive UI solutions that improved usability and overall customer satisfaction.
- Utilized advanced computer knowledge to navigate and resolve complex issues efficiently.
- Consumed RESTful APIs to perform CRUD operations, enabling seamless data interaction between frontend applications and backend systems.
- Collaborated with cross-functional teams to identify inefficiencies and implement process improvements that enhanced service quality and system stability.
- Developed and executed comprehensive test cases to identify bugs early in the development cycle and ensure stable product launches.
- Improved product SEO and search quality using features like Schema markup to enable the display of rich, more engaging results and increase product search visibility.
